Matteo **Barbero**
Software engineer

About me

I am a backend developer specialized in refactoring legacy code, optimizing system performance, and implementing seamless API integrations. Additionally, I have led initiatives to streamline deployments using Docker and contributed to building data-driven solutions for sustainable innovation.

personal

Matteo Barbero
nationality: Italian
1990

Areas of specialization

Backend · Leadership · API · Project Management · Web Scraping

Interests

I am passionate about running, outdoor sports, and climbing, which fuel my love for adventure and staying active. Outside of sports, I enjoy coding and experimenting with different programming languages, such as Go, and exploring new solutions to technical challenges.

Short Resumé

2024–today | **Innovatiespotter**
Software Engineer · Groningen - Netherlands 📍
At Innovatiespotter, I developed and maintained a PHP-based SaaS platform supporting large-scale data operations for sustainable innovation. I implemented RESTful APIs with FastAPI, led Docker containerization for streamlined deployments, and worked on advanced web scraping solutions using NestJS.

2023–2024 | **Tannico**
Software Developer · Milan - Italy 📍
At Tannico, a leading e-commerce company for wine and spirits, I maintained and enhanced a large-scale Magento backend. I also supported a Symfony-based invoicing SaaS product and a NextJs white label e-commerce.

Degrees

2021 **Multimedia Design and Management for Communication.**
Postgraduate Master · Turin - Italy 🏛

2013 **Political Science**
Bacheloor Degree · Turin - Italy 🏛

Programming
